

## SPRAYING GUNS / DRYING GUN

### BX10HYDRY

**MADE IN ITALY**

**Developed for the quick and effective compressed air drying of surfaces coated with a water or solvent based paint**

**The main features of this system is that there are absolutely no electrical parts involved in heating the air**

**The ergonomically designed and thermally insulated grip makes it easier to handle and safer during use**

**This gun has been created to provide an all-in-one product suitable for different blowing uses with specific settings and with different working distance from 5 cm (medium volume and high temperature) up to 50 cm (high volume room temperature)**

**Working pressure:** 2 - 6 BAR

**Air consumption at 4 BAR:** 300 l/min cold air

600 l/min hot air

**Blowing distance:** from 5 cm to 50 cm
